

ARENAS | STADIUMS

GATES AND VISITOR ENTRANCES

HI-SCAN 6040i & 6040-2is

Generate highly detailed and easily interpreted X-ray images

Systems offer a background contrast function that aids in the recognition of objects on the screen

Easy to deploy and operate dual-view version provides two alternate views to reduce the need to reposition and scan items multiple times

Walk Through Metal Detector

Walk through metal detectors (WTMD) enable rapid throughput while detecting metallic objects quickly and effectively

Intercept firearms, knives, and other weapons with ferrous and non-ferrous metal components

Easily assembled and dismantled; ideal for rapid deployment at temporary checkpoints

IONSCAN 600

Intercept unseen narcotics and explosives at points of entry

Swab surfaces of belongings, hands and clothing to rapidly screen people and flag for further search

Due to size and weight, temporary checkpoints can be set up quickly and easily

HI-SCAN 5030si

Capture X-ray images revealing the contents of backpacks, handbags, and other personal belongings

Lightweight and compact size enables mobility through doorways, elevators and tight spaces

Gives facilities the flexibility to conduct screening at various checkpoints, or at random locations

DELIVERY AREA

HI-SCAN 100100v and 100100v-2is

Reliable and easy to operate

Screens crates and luggage up to 39"x39" in size

HI-MAT Plus technology provides advanced material discrimination

Low conveyor height for easy loading

Dual-view version provides two alternate views to reduce the need to reposition and scan items multiple times

IONSCAN 600

Analyze the surfaces of parcels, freight, and packages to detect the presence of explosives and narcotics before allowing them into your facility

Portable and lightweight for movement between buildings and loading dock areas

On-board batteries allow for seamless operation when removed from its power source

MAIL ROOM

HI-SCAN 5030si

Conducts fast scans to expedite mail inspection

Aptly sized tunnel can accommodate various size parcels, packages and boxes

Comes in a smaller overall footprint to provide mobility inside a property or its perimeter as needs evolve

Easy to operate and use

IONSCAN 600

Expedites mail screening by enabling multiple packages to be screened simultaneously

Due to size and weight, set-up temporary checkpoints as needed

Detect, identify, and contain hazards before they are handled and distributed by employees
