HOTEL SECURITY

LOBBY AREA

HI-SCAN 6040i & 6040-2is

Produces airport quality screening and is user-friendly

System generates highly detailed and easily interpreted X-ray images with a background contrast function that aids in the recognition of objects on the screen

Simple operation & interpretation for hotel security to use as they scan baggage and large packages coming into the hotel

Walk Through Metal Detector

Intercept firearms, knives, and other weapons with ferrous and non-ferrous metal components

Easily assembled and dismantled; ideal for rapid deployment at temporary checkpoints

Millimeter Wave (MMW) imaging, with technology similar to that found in airport body scanners is available.

IONSCAN 600

A desktop unit used to screen for narcotics and explosives at points of entry

Automatic analysis upon sample insertion for quick and efficient screening of guests

Due to size and weight, temporary checkpoints can be set up quickly and easily

HI-SCAN 5030si

Portable machine that scans small-sized personal belongings of lobby guests such as purses, totes and backpacks

Minimal footprint that does not detract from the ambiance of the lobby

Lightweight and compact size enables mobility through doorways, elevators and tight spaces

DELIVERY AREA / LUGGAGE SCANNING AREA PRODUCT RECOMMENDATIONS

HI-SCAN 100100v-2is

Reliable and easy to operate

Screens crates and luggage up to 39"x39" in size

Dual-view version provides two alternate views to reduce the need to reposition objects or break shipments down to scan items individually

MAIL ROOM / STAFF ENTRY / PERIMETER PRODUCT RECOMMENDATIONS

HI-SCAN 5030si

Delivers quality images when screening backpacks and larger items

Comes in a smaller overall foot print and provides mobility inside the hotel and its perimeter as needs evolve

Easy to operate and use
