

**Commercial Freight Services, Inc.**

October 15, 2009

As a company whose success relies on providing time-critical services to our own customers, we recognize and greatly appreciate when one of our vendors can offer the same service to us.

We determined that becoming a Certified Cargo Screening Facility (CCSF) would allow us to continue to provide the high level of service that our customers expect from us while complying with TSA 100% air cargo screening mandate.

We selected Smiths Detection's dual-view pallet X-ray system and explosives trace detector in the process of becoming a CCSF because the company offers both types of technologies recommended by the TSA and the quality of the systems was evident when you saw them in action. In addition, Smiths met our delivery and installation requirements.

The systems have been installed for 6 months and we can say they both have performed reliably and met our expectations. Smiths Detection has been attentive to answer any questions and always available to assist us where needed as we evolve with this program.

Sincerely,

Dwight D. Fairchild  
V.P. Operations
