

November 2009

We purchased a HI-SCAN 100100T-2is X-ray system to screen shipments of perishable foods. We knew we wanted to get a jump on the screening mandate, but also knew we had a lot to learn. Smiths Detection worked with us from the beginning, helping us understand how the technology worked and selecting a system that fit our needs and our budget.

The system was installed six months ago and we have been very happy with its performance.

Sincerely,

A handwritten signature in black ink, appearing to read "Bryan Jennings". The signature is stylized with a large, sweeping initial letter.

Bryan Jennings
