TRAINING OVERVIEW

The Operator Training is designed to ensure users can effectively operate the unit and perform basic troubleshooting tasks. This online course is aiming specifically at operators within urban security sectors.

Operator Training for HiTraX is available to all and does not have any prerequisite training requirements. The course covers operation of different unit types ranging from mailroom screening, hand baggage screening over to the inspection of small freight.

The course consists of 11 modules packed full of practical information for Operators covering a range of useful topics from basic controls and scanning process to image enhancement and troubleshooting. The course employs state-of-the-art learning design principles, applying engaging 3D animation, video contents and interactivity to deliver a positive and immersive online training experience.
