HI-SCAN 5030si

The HI-SCAN 5030si is a compact, portable X-ray inspection system. It produces clear, high resolution images in real time and its advanced X-ray technology classifies different material to assist operators in finding suspicious objects including metals and organic substances.

Expertly designed with a school building in mind, the HI-SCAN 5030si is compact allowing it to be easily rolled down narrow hallways and through small doors. Its lightweight and durability makes it ideal for transport by van, enabling it to be shared among several buildings or across school districts.

The keyboard and monitor can quickly be detached and stored separately for protection and security. The unit has key software and image enhancement functions to ensure fast, easy and reliable security X-ray inspection and image evaluation.

HI-SCAN 5030si, featuring a simple operator interface, is suitable for use in a wide variety of environments including lobbies, gymnasiums and outdoor locations when protected from weather. The unique tunnel size of the system is large enough to screen backpacks, handbags, shoes, letters, and small parcels.

SCREENING AND DETECTION SOLUTIONS FOR:

- Student / Visitor Entrances
- Mail Screening
- Contact Free Inspection

**KEY FEATURE:
ADVANCED
X-RAY TECHNOLOGY**

Enables material discrimination for quick image evaluation

**KEY FEATURE:
EASY TO USE
INTERFACE**

User guided software assists operators with image evaluation
