PRINCIPAL OPERATING REGIONS

Smiths Detection operates in nearly every country across the globe. We have offices in over 20 countries, including eight R&D facilities, and manufacturing sites in France, Germany, Malaysia, the UK and USA. Our dedicated, aftermarket team provides extended global coverage to deliver the most reliable service programme anywhere – and everywhere – in the world.

CUSTOMERS

We are a trusted partner to over 100 governments and their agencies, including homeland security, customs authorities, and the military. We provide solutions and support to airports, and help protect people, buildings and infrastructure across the globe. We work alongside customers to create tailored solutions to meet their specific requirements and to develop new products that address ever evolving challenges.

R&D PARTNERS

In the past ten years, Smiths Detection has invested over £500M in R&D, conducted by our highly-skilled team of engineers, chemists and scientists in conjunction with research partners, including Microsoft; U.S. Department of Homeland Security; US Department of Defense; UK Ministry of Defence; Imperial University, John Hopkins University; and Duke University; The EU – as we have numerous funded development programmes; CEA France – Commissariat à l'énergie atomique et aux énergies alternatives.
